

Simple Secure Email for the Desktop

DataMotion’s SecureMail is a service that protects all of the important information flowing between you, your business partners and your clients. At the same time, it makes life easier for everyone. From the moment you hit the “Send Secure” button, until your mail is delivered, sensitive messages and files are fully protected. It’s simple. It’s fast. It’s smart. SecureMail is perfect for small to medium size organizations.

Compliance without Complication

Secure email is a legal requirement for those who must comply with privacy regulations like HIPAA, HITECH, and PCI. With SecureMail, compliance is achieved without complication. It protects all of your sensitive messages with military-grade encryption, and it gives customers assurance that their private information is being handled with care. Secure messages and files with one click and get instant confirmation when they have arrived safely. And, because it works with popular email clients such as Outlook, it’s intuitive for senders and recipients, and can be up and running in minutes with no outside IT support. SecureMail makes good business sense.

Better Customer Service and Lower Costs

SecureMail improves response time and saves money. Your customers no longer have to wait for the mail to get passwords and other sensitive information. And, communications don’t stop when people are on the move. SecureMail works just as effectively with smartphones. Because SecureMail provides confidential delivery with confirmed receipt, it replaces costly faxes, printing, postage, and courier services with a greener and less expensive alternative.

“SecureMail streamlined the way we work, resulting in increased productivity and happier members. It enables us to compete with much larger organizations.”

– Altra Federal Credit Union

DataMotion SecureMail helps you meet all types of regulatory compliance
