

## Softlinx Cloud Fax Service

***Visit ReplixFax website for secure, reliable Cloud Fax Service for healthcare and financial industries.***

Softlinx Cloud Fax Service delivers HIPAA compliant, secure cloud faxing service to meet the most demanding business faxing requirements with no upfront hardware and software capital expenditure. Going to the Cloud Faxing also frees up internal IT staff resources to manage any on-premise faxing systems.

With a comprehensive set of cloud fax APIs and toolkits, your business applications can be easily fax-enabled to send and receive documents from within any application securely and reliably.

Softlinx Cloud Fax Service is provisioned leveraging a top-tier data center and network infrastructure for 24x7 service availability. Softlinx also provides 24x7 customer support to our cloud fax service customers. You can depend on us for reliable, secure and high performance business fax communication.

### **Highlights of Softlinx Cloud Fax Service:**

- Automated faxing from any business application electronically
- Fax submission via E-mail, Browser based Fax client, or native Windows application
- Fax administration using Web based Fax Admin client
- Barcode fax service
- Enterprise class data center with high availability and security
- Advanced fax network infrastructure using telco-grade fax over IP
- 24x7 customer support

### **Benefits of Cloud Fax Service:**

- No capital investment for on-premise fax server or phone lines
- No need to manage in-house fax server and communication lines
- Eliminates manual faxing by up to 90%
- Speeds up document delivery and business workflow processes
- Saves IT staff resource for more strategic or new IT projects
- Simplifies IT infrastructure and management overhead
